# THIS IS MY WORLD

*Sima Zadeh & Lori Wiener*

We are so pleased to share with you the second edition of *This is My World*. We would like to acknowledge both the generous staff support and funding provided by the NIMH Intramural Program. Our gratitude is also extended to all the children who so thoroughly reviewed the pages of this workbook so that it would have the most meaning for other children living with a medical illness.

This workbook has been created as a psychotherapeutic tool for therapists to use in working with children and adolescents who have been diagnosed with a medical illness. The activities included in this workbook were designed to facilitate rapport building and contribute to discussion surrounding the various aspects of the child's life, including: views on self, family, friendships, school, illness, and the future.

It is advised that therapists utilize the workbook at a slow pace, encouraging verbal interaction and a more thorough discussion of the different concepts that are presented. This way, the workbook can be successful in identifying problems, eliciting concerns, and expressing frustrations, hopes, dreams, and/or anxieties.

Most importantly, keep in mind that this is the child's own book about him/herself. The time and effort they put into completing the pages should be encouraged and should be viewed as something to feel proud of. Therapists are encouraged to have a variety of colored pencils, crayons, and/or markers available so that children can be as creative as they wish. In the future, children and adolescents, and/or their families, will be able to refer to this work as a glimpse of the journey of living with their illness.
