

## Sharing Your Screen via Ms Teams

Occasionally when you have an issue with Mosaic and you need assistance, I would normally ask you to share your screen so that I can see the problem.

To **share your screen** you will need to do the following:

From the **MS Teams call**, you will see the options below. You will need to click on the **share** icon.

You will have different screens (**Desktop** and **Window**) to share.

It is best to select the **Screen #1** under **Desktop**.

Selecting this option will enable you to easily change and share different workflows.

To **stop sharing** your screen, click on the icon below.
