

Visit/Conversation Reflective Journal Sheet: Identity

Date of my visit/conversation:

Mosaic ID for the person I met with:

Things I was struck by during this visit/conversation:

Things I noticed or that came out in conversation about this person's identity (social, personal, professional, familial, cultural etc) and why that felt important (to them, to me, to someone else):

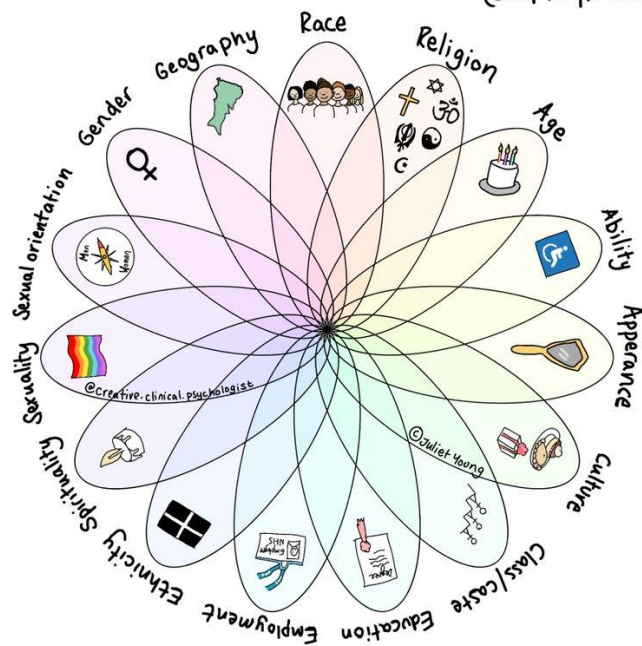

What similarities or differences did I notice between me and the person I met with? Why did those things stand out? Are those things influencing the way I think about or respond to this child and family? Or the way they might be responding to me? What might I have missed?

Things I'm curious about or don't know that I should follow up:

Why am I curious about those things (why do they matter to the help I'm giving). How might I reflect these things in the family's assessment, plan, or goals? Who could help me think about this?
