

• WHAT IS SPECTRUM? •

Spectrum is a UCL medical school-led charity, providing opportunities and befriending children in the Camden borough with disabilities

Children with special needs are paired with two volunteers, who meet up with their linked child every fortnight, with visits and outings ranging from home-visits, trips to the local zoos, cinema - all catered to the interests of the child and family

INTERESTED?

All of our volunteers are medical students and are enhanced DBS checked, receiving prior training on the spectrum scheme. The purpose of the visits to the child is to provide the basis of a friendship, encouraging and challenging the children to achieve things they may not ordinarily do with families with much needed respite
